Education

École Polytechnique Fédérale de Lausanne (EPFL)

Master of Computer Science

- Specialization in Artificial Intelligence and Data Science.

Sep 2025 – Ongoing

Lausanne, Switzerland

University of Prishtina “Hasan Prishtina”

Bachelor of Computer and Software Engineering

- **GPA: 10/10 (4.0)** — Dean’s List Representing my Faculty (FIEK).

Oct 2022 – July 2025

Prishtina, Kosovo

TOEFL iBT: 110/120 - English C1 Proficient.

- **Technical Project Leader**, ASSET Club (USAID) 2022 — Led my team to **3rd place** in a national ICT competition.
- Certified **Software Development**, University of Business and Technology 2022

Work and Experience

Raiffeisen Tech

Data Engineering Intern

- Built data pipelines using **Python**, **SQL**, **Pandas** and **Databricks**, including web scraping, data cleaning and CDC.
- Designed **CI/CD** workflows with **GitHub Actions** for automated building, testing & deployment of project’s jobs.
- Improved development workflow and traceability using **Git** & **Jira** (branching, PR reviews, ticketing).

Mar 2025 – July 2025

Prishtinë, Kosovo

EPFL Spacecraft Team

End-to-End Systems Engineering

- Developing spacecraft software in C++ and Python for flight and simulation systems, software for in-space operation.
- Integrated spacecraft systems, FastAPI services, and command/telemetry infrastructure.

February 2026 – Present

Lausanne, Switzerland

Freelance Web Developer

Full-Stack Web Development

- Built responsive websites using **React.js**, **JavaScript**, **HTML5** and **CSS**, integrating REST APIs.

2023 – 2025

Remote

Projects

DocAI — Bachelor Thesis Project

FastAPI | **RAG** | **PostgreSQL** | **Qdrant** | **LLMs**

- Implemented a **hybrid RAG** architecture combining keyword + semantic retrieval for accurate legal query answering.
- Built **ETL pipelines** to scrape, clean, structure, and vectorize Kosovo public legal documents for retrieval.
- Developed a scalable backend using **FastAPI** with persistent session data in **PostgreSQL** and vector search in **Qdrant**.
- Integrated context-aware chat (memory/session context) and dynamic workflows to support multi-step user interactions.

Robust Journey Planner

Apache Spark | **Hadoop/HDFS** | **Python** | **XGBoost**

- Processed **65M+** historical SBB records and trained 7 XGBoost quantile models for transfer-risk estimation.
- Extended backward Profile CSA with confidence pruning and OSM walking paths across **14M** Swiss connections.
- Optimized in-memory routing to **58 ms** regionally and **3.8 s** nationwide on average.

EPFL — ISREC Laboratory (Swiss Institute for Experimental Cancer Research) Research Project

- Worked on Vision Transformer-based cell segmentation from tissue images for disease and tumor analysis.
- Tested decoder variants and training strategies to improve nuclei segmentation, especially on rare cell classes.

Technical Skills

Languages: Python (4+ years), C, C++, Java, SQL, PHP, HTML5, CSS, JavaScript/TypeScript, React.

Tools & Platforms: GitHub Actions, Databricks, PostMan, Jira, Git, Adobe Creative Suite, Linux Commands.

Frameworks & Libraries: PyTorch, Pandas, Spark, Scikit-Learn, FastAPI, SpringBoot.

Concepts: ETL/ELT, Data Modeling, API Design, RAG Pipelines, Auth (JWT), Distributed Systems, CI/CD.
